C1 CUTTING SAW

The Decom C1 cutting Saw is a single blade saw with the highest cutting torque available on the market today. It has been designed & developed to cut tubular ranging between 4"-20" diameter. With specialist designed blades that allows it to cut any steel section including mooring chain and even flexible risers & umbilicals. It has a self adjusting blade system which automatically adjusts the speed rate to the cutting rate delivering the most efficient cut. It will provide the fastest and most precise solution required.

C4 CUTTING SAW

The Decom C4 cutting saws have been designed for conductor recovery cutting.

Three base models are available:

- o 26" Conductor
- o 30" Conductor
- o 36" Conductor

Each saw can cut through solid sections (conductors with cement filling) and can have Decom's drilling and pinning units attached.

Using the drill & pinning units in tandem with the C4 saw makes any Plugging & Abandonment job safe and efficient. Saving time, money and most importantly boosting your companies safety record.
